IRONTON, MO., THURSDAY, MARCH 16, 1882.

Boatmen's Shool Punishments. A Paper by Prof. Geo. W. Register, and read

The necessity for punishment is the result of a disordered moral condition. A disordered organism is a diseased I must be permitted to hold as repre-one; and these diseases may arise from hensible in the extreme. I do not

toms. The teacher must, therefore, know his pupils. And may I not say that one of his most difficult tasks on teach them successfully.

It must eradicate the existing disorder

But I have alluded to the history of the case. By this, I mean the causes which combined to induce the pupil to do wrong. This feature extends as far back as home treatment of the child. get that the strongest impression is the one that leads to the inclination—
"As the twig is bent, the tree inclines."

the opposite; for, if the harsh treatment did not check the tendency to rudeness, it is prima jacia evidence that it

was wrong. We must not overlook the spirit of the teacher in exercising this authority to punish. It should not be exercised when either teacher or pupil is liable to be influenced by passion. It the teacher's passions be aroused, the pupil is likely to conclude that he was punished to gratify that passion, when old Human Nature arises in is might and says, "I defy your force." In such a case the teacher compromises his manhood, and the pupil's obstinancy is increased. Reason and judgment must control, or the desired ends can not be secured. Good judgme alone can determine the kind, the degree, and the time of punishment. When it does become necessary to chastise, time should be taken, that passion may subside and for reflection, that the may be prepared to administer it and the other to receive it. Nor should any punishment be inflicted except in the presence of the school. The res-sons for this are obvious. The teacher should protect himself against possible false reports of private punishment and the school should profit by the ex ample. As to the degree of punishmen it should always be sufficient to mee all demands of the case and no more and the pupil should clearly under stand why he was chastised, and n mode should be adopted whereby h may be liable to sustain any permanent physical or mental injury therefrom. It is also necessary in the exercise of this authority that the teacher carry with him the popular sentiment of the school. All may agree that A. deserves punishment; but if the teacher adopt an unusal mode, or apply an usual one to excess, the sympathy of the school

be correspondingly lessened. But it will be expected, in a paper on this subject, that some of the particular kinds of punishment common in our cred with water. Main street was covered with skiffs, canoes, rafts, sections of public schools shall be noticed. The Flood at New Madrid.

ate overflow from the New Madrid Record:

The recent flood in the lower Mississippi valley is the most remarkable ever known. When he news was received here that the river at St. Louis had rose 17 feet in 36 hours, it was not credited. When the news was actually confirmed, and it was further stated that all the rivers above were rising with unprecedented rapidity, great uneasiness was manifested by our people, and the news of the coming flood was sent by messengers to Donoldson's Point, No. 8, St. John's township, and to points below. The river was full and rising two or three inches every 24 hours, and the situation was indeed threatening. The flood reached here Friday morning (Feb. 24) and the water rushed up the ditches from the river and bayou, and by night had covered will at once be awakened in A.'s be- Main street as far north as the Record office, half, and the teacher's influence will Our citizens retired Friday night with gloomy forebodings of the morrow. Saturday dawned dark and foggy, and revealed to the inhab rendering it the gloomiest Sunday ever see in the ancient city of New Madrid. At dus the mantle of charity." As we are the marks showed that the water had only dealing with rational beings, let reason rose one inch and a quarter that day, and was thought to be on a stand. Monday morning A very common punishment for a showed the weather unchanged and a quarter lack of preparation of lessons, is the of an inch rise on the marks. The greatest impatience was manifested to get news from

school management.

The teacher's relation to his pupils is that of parent and child; he stands in loco parentis. During his term of employment, he posses legislative, judicial, and executive authority, delegated to him by the community employing him. Out of these relations to his school grows his authority to inflict punishment for the violation of law.

The necessity for punishment is the result of a disordered moral condition.

The dislike become. So it is in trying to force upon a pupil a subject for which, from some cause, he has formed a dislike.

As to retaining pupils after school hours, or at recess, the practice is objectional, because he needs recreation, and to deprive him of it might work a serious injury. A part of a recess may sometimes be taken, but in no case should any one be wholly deprived of it.

But there are methods of punishment is the result of a disordered moral condition.
